## DETAILED ACTION

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 6, 8, 12, 16, and 17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S.

Patent No. 6,658,219. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant invention read on the claims of US Patent No. 6,658,219.

US Patent No. 6,658,219 claims in claim 1 a measurer for measuring a remaining amount of expendable material contained in the cartridge which is the same as the instant invention's measurer (instant invention's claims 1, 6, 8, 12, 16, and 17); and a determiner for comparing the remaining amount measured by the measurer with a remaining amount of the expendable material previously measured which is the same as the instant invention's determiner (instant invention's claims 1, 6, 8, 12, 16, and 17). US Patent No. 6,658,219 claims in claim 2 that if the cartridge is determined as an

Art Unit: 2852

improper cartridge, then image recorder inhibits image recording operation which is the same as the instant invention's inhibitor (instant invention's claims 1, 6, 8, 12, 16, and 17). US Patent No. 6,658,219 claims in claim 3 an indicator for indicating alarm information if the cartridge is determined as the improper cartridge which is the same as the instant invention's alarm means (instant invention's claims 1, 6, 8, 12, 16, and 17).

Claims 2-5, 7, 9-11, and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
